

# Are you finding it hard to work?

- Depression can make it very difficult to function at work, school, and social events.
- People with depression experience rewards differently which may affect how they function.

## Please help us treat depression better

- Researchers at St. Michael's Hospital are studying the **links between function and reward experience** in depression and how it may be affected by treatment
- We are recruiting people diagnosed with **Major Depressive Disorder**
- Participation includes questionnaires about your mood and function, reward tests, and brain imaging
- Participants will receive **treatment with a Health Canada approved antidepressant**

**Please contact Troy at (416) 864-6060 ext. 7844 or [ChowT@smh.ca](mailto:ChowT@smh.ca)**  
If you would like more information about the study or are interested in participating
